This allows one to play without having to rely on one's dice roll. A player can use a "caller" to have his roll stored in the raid roll. The first player wins the raid and receives the top prize, which is worth one randomly drawn card from the deck of cards. The second player wins the second prize and so on. The last person to remain, the first-bye player, wins all cards on the table.

The round continues until all players except one have dropped out. See also Carnival poker References Category:Poker variantsA rigorous approach to medical errors. Medical errors, the failure of one or more elements of health care to result in the optimal outcome for the patient, can be classified into six basic types. This paper describes a method to systematically analyze them using the medical literature, and an analytical model to solve the problem in the context of a group of hospitals. The quality assurance committee then inspects the use of the methodology and results in recommendations for each hospital. For example, in one hospital, the analysis revealed that error-prone nursing practice practices were not reflected in the management system. This approach to medical errors can be used to guide hospitals in eliminating errors and developing better practices. On November 22, 2013, the President signed into law: "A bill to amend the Federal Tort Claims Act to ensure the rights of United States employers and their plan providers to seek equitable relief for workplace safety violations." Section 2(b) of this bill amends the Federal Tort Claims Act to allow employers and their plan providers to seek equitable relief for workplace safety violations, in addition to the damages described in the Act. The bill clarifies that such equitable relief can include temporary or permanent injunctions, temporary or permanent suspensions or removals of equipment or personnel, and the imposition of civil penalties.
